- **Limetree Bay Terminal & Limetree Bay Refining**

- Region 2 awaits receipt of LTB's response to our comments provided on 5/16 regarding the EJ modeling protocol. Their consultant did not find the comments to be an issue and indicated they should be able to respond to Region 2's comments by early this week. The EJ modeling analysis should then follow in two to three weeks. In a related matter, a draft Plantwide Applicability Limit (PAL) permit is currently undergoing internal Region 2 review.
